Please, carefully review this final judgement against Microsoft. I believe the wording of the document leaves sufficient loop holes and gray areas that it would allow Microsoft to continue its practices of market domination that have cost so many other companies their solvency.

I am a computer professional with over 20 years experience in the field of Information Technology. I believe that if the same barriers to the space program existed as those Microsoft has imposed upon I.T., we never would have learned to fly, much less put a man on the moon.
